PRESSURE PRODUCTS

REPAIR / RECERTIFICATION

We can repair or remanufacture virtually any blowout preventer, control unit, manifold or valve back to the service level you expect – regardless if the equipment is AXON OEM or another major brand.

REPAIR & REMANUFACTURE

AXON's seasoned technicians are highly experienced in disassembly, inspection, re-assembly, parts replacement and testing services (including correlative machining, welding, heat-treating, etc). Our goal is to return your equipment to industry standards as efficiently as possible, whether you need:

- Reconditioning to OEM specifications
- Reconditioning to achieve specified operational requirements
- Repairing or servicing to resolve identified issues/malfunctions

CERTIFICATION

Our comprehensive engineering capabilities and technical library, along with our certified API Q1 Quality Management System (QMS), result in peace of mind that all your work is performed with full AXON OEM certification and warranty.

RECONDITIONED EQUIPMENT

AXON delivers a wide breadth of reconditioned pressure, well and flow control equipment that meet all applicable API standards.

USED EQUIPMENT PURCHASE

We have a dedicated group focused specifically on reconditioned equipment. This allows us to furnish certified remanufactured equipment to meet your quick delivery needs.

AXON also stocks an extensive inventory of reconditioned equipment (in all major brands) that are typically utilized in the field. We are committed to helping you achieve minimal downtime and reduced operational costs.

EQUIPMENT TRADE-IN

To further service your needs, AXON offers trade-in and buy-back programs for used equipment that meet API standards.

TRUSTED QUALITY

All repairs, reconditioning, remanufacturing and rebranding are completed at our API Q1, ISO 6A, 16A, 16C or 16D licensed facilities.

REPLACEMENT PARTS

We maintain a large inventory of the most requested replacement parts to provide you with the shortest turnaround time possible. AXON's full line of aftermarket replacement parts are available for immediate delivery.

STRINGENT QUALITY MANAGEMENT

Our replacement parts are manufactured to AXON's API Q1 certified QMS to ensure all customer and industry specifications are met.

Benefits include:

- Wide range of parts available to meet your specific needs
- OEM QMS strictly enforced for continued operational success
- Collaboration with customers/suppliers to achieve optimized traceability and document control systems

LOCAL DISTRIBUTION

AXON local Service Centers stock replacement parts based on anticipated requirements of regional customers. Our goal is to deliver the replacement parts you need, when and where you need them.

FIELD SERVICES

From on-site maintenance to technical support, our seasoned land, offshore and subsea field technicians are on-call & ready to assist you 24/7.

INSTALLATION / REPAIR / MAINTENANCE

AXON offers a full range of installation, training, commissioning and preventive maintenance services for all major types/brands of pressure, well, and flow control equipment, such as:

- Re-configuring and replacing/rebuilding manifolds and their internal parts
- Disassembling and inspecting valves, BOPs and control units
- On-site repairs without removal from service
- Updating flanges to API specifications
- Conducting hydrostatic pressure tests up to 22,500psi
- Troubleshooting and diagnostics
- Field inspections

ASSET MANAGEMENT

Our A-360 Asset Management Suite delivers advanced functionalities to efficiently manage your critical oilfield assets. AXON's software solutions and RFID technologies help you improve asset visibility and documentation for optimal control and planning.

TECHNICAL EXPERTISE

The AXON aftermarket group is available 24/7 to support and schedule your global field service assignments, engineering requirements and replacement parts needs. Our expertly-trained technicians can service, repair, and recertify all AXON and most leading manufacturers' pressure, well and flow control equipment.

ENGINEERING CAPABILITIES

From our extensive technical library to our multidisciplinary engineering teams, we truly understand the importance of engineering support from design through aftermarket. The result: Regardless of size or complexity, your specific requirements will be achieved.

WORLDWIDE SUPPORT

With global locations in 8 countries and 120+ years of combined land, offshore and subsea aftermarket experience, we are prepared to provide the quick response and superior know-how that you require. Additionally, all AXON global repair facilities are API certified.

AFTERMARKET IS NOT AN AFTERTHOUGHT™

Our focus is to deliver high-quality products that perform, as well as ensure you receive continued customer satisfaction. From immediate maintenance on equipment at your operating site to skilled re-manufacturing services, you can count on AXON for an exceptional aftermarket experience.
