Mechanical Assembly Technician

Houma, Louisiana 70360

AXON Energy Services is a global oilfield equipment manufacturer, engineering provider, and aftermarket service company. We offer competitive compensation, extensive benefits package and future growth opportunities within the company. Plus, we work to maintain the best possible environment for our employees where people can learn and grow with the company. Axon is an Equal Opportunity Employer

Assembly Duties:

- Assembles, diagnoses, repairs, and maintains complex machines, equipment, and their subassemblies in accordance with standard operating procedures and under limited supervision.
- Reads, interprets, and follows blueprints, diagrams, engineering drawings, specifications, bill of materials, and other written or verbal instructions to accurately assemble/disassemble equipment and products.
- Assembly procedures include: Laying out piece parts by use of various measuring tools and installing through various methods. Installing moving parts, such as shafts, levers, or bearings, and working them to test free movement. Drilling, tapping, or reaming holes. Aligning components, and bolting, screwing, or riveting them together. Removing small quantities of metal to clean parts or to produce close fit between parts. May bend and install pipe for hydraulic systems. May fit and solder tubing and fittings
- Tests or assists in testing operation of completed product.
- Identifies and notes problems or hazardous conditions that occur during assembly and test.
- Identifies product defects and completes appropriate documentation when defects and non-conforming products are identified.
- Performs all work in accordance with quality standards and established safety procedures.

Required Skills and Experience:

- High school diploma or general education degree (GED) and three to five years related experience and/or training; or equivalent combination of education and experience.
- Must be able to read and correctly interpret prints/drawings and specifications.
- Hydraulic/Pneumatic/Electrical experience a plus.
- Experience with Blow Out Preventer (BOP) equipment, Manifolds/Gate Valves, and BOP Control/HPU Systems a plus.
